## Overview

In February 2022, a number of the first occurrence data fields contained in category [1712](#) were updated. The update comprises new mappings of additional clinical codes to the ICD10 codes used to construct the first occurrence data fields.

In particular, 45 additional Read v2 codes and 204 Read v3 codes from the primary care data were newly mapped to the ICD10 codes used to construct the first occurrence fields for diabetes (those within [category 2404](#)).

In addition, 114 codes covering a range of self-reported medical conditions (contained in data field [20002](#)) were mapped to the ICD10 codes used to construct a number of first occurrence data fields. Details of all the new additional mappings are provided in the tables below.

A complete list of all the mappings between the Read v2, Read v3 codes and the self-reported medical condition codes and the ICD10 codes used in the first occurrences are provided in [Resource 11419](#).

## Mappings from the primary care data

The tables below show the additional Read v2 (Table 1) and Read v3 (Table 2) codes that were newly mapped to the first occurrence diabetes ICD10 codes. The majority of the additions are to E10 'insulin dependent diabetes' data fields (data fields [130706](#) and [130707](#)) and E11 'non-insulin dependent diabetes' (data fields [130708](#) and [130709](#)), but there are also additions to E13 'other specified diabetes' (data fields [130712](#) and [130713](#)) and E14 'unspecified diabetes' data fields (data fields [130714](#) and [130715](#)).

In addition, one Read v2 code mapping was amended. Read v2 code C10FS is now mapped to ICD10 code E13 (this was previously mapped to E11).

## Mappings from the self-reported medical conditions

Table 3 shows the mapping of newly added self-reported medical condition codes to the first occurrence ICD10 codes (self-reported codes are contained in data field [20002](#) and use codes listed in [Encoding 6](#)).

Additionally, the mapping of two self-reported medical condition codes was amended: code 1236 is now mapped to ICD10 E27 – Other disorders of the adrenal gland (previously this was mapped to D35 – Benign neoplasm of other and unspecified endocrine glands), while code 1468 is now mapped to G63 – Polyneuropathy in diseases classified elsewhere (previously this was mapped to N08 – Glomerular disorders in diseases classified elsewhere).
